## Site Survey for NC2 Espresso Machine Installation

- Adequate dimensions and strength of work surface, checking height 510mm, width 710mm, and depth.  
Overall depth: 600mm  
Back of machine to front of front foot: 460mm  
Back of back foot to front of front foot: 410mm  
Separate Grinder dimensions: H: 560mm W: 210mm D: 330mm
- 13 amp power supply within 1 metre of machine.
- Cold water supply within 1 metre of machine (under the countertop) with  $\frac{3}{4}$  inch washing machine fittings.
- Waste below machine, if not available a bucket for waste to run into. (ideally with completely vertical drop to allow water to run away freely) the hole needs to be located centrally under the espresso machine and with a diameter of 50mm.
- Sufficient space for a water filter, to be located between machine and water supply (Length 490mm x Diameter 222mm).
