

NC45

The NC 45 combines high efficiency output, long life precision engineered components and Barista quality drinks. At the touch of a button the NC 45 machines can produce an almost endless variety of coffee and milk based beverages.

The precision engineered metallic body and brewer are designed for long life and high stability with lower drift factors than most brewers in the market.

The first low capacity machine to use boiler fed steam, found on all high capacity machines this produces hotter and smoother milk foam than typically used heating blocks.

The powerful internal brew system can provide an almost endless variety of coffee beverages at the touch of a button with a high level of customisation.

Be your own Barista.

CAPACITY

Hourly output based on DIN18873-2

	NC 45
Advised daily output*	100 cups
Espresso (50ml)	70 cups
Americana (210ml)	40 cups
Cappuccino (200ml)	40 cups
Hourly hot water output	30L
Water tank capacity	4L
Beans hopper capacity	1.5kg
Powder hopper capacity	Milk Powder 1200g/Choc Powder 200g
Grounds container capacity	70 Drinks
Drip tray capacity	1.5L

*Based on DripTray Capacity

TECHNICAL SHEET

Technical Figures	NC 45
-------------------	-------

Coffee machine	220-240V~ 50/60Hz 2700-31DOW
Connection tube set	G3/4' change into G3/8' length 1.5M metal tube
Water pressure range	Max.0.6MPa
Coffee machine (WxDxH)	34cm x 54.5cm x 62 cm
Weight	25 kg 25.5 kg 26 kg

CONFIGURATION

(● Standard ○ Optional)
